Location:	Birmingham, UK
Products Used:	LCN Sentronic 4040SE Single Point Hold Open Door Closers LCN 4313ME Multi Point Hold Open Door Closers LCN 1460DA Door Closers

Heartlands Hospital in Birmingham carried out a fire safety upgrade on the doors in the Outpatients Department. This involved upgrading some doors to FD30S fire doors by either fitting completely new door and frame sets or, in some cases the simple addition of smoke seals and a fire rated door closer such as the LCN Sentronic Multi Point 'hold open' closer.

For the recent Outpatients upgrade Relcross Architectural Ironmongery supplied LCN Sentronic 4040SE Single Point Hold Open Door Closers, LCN 4313ME Multi Point Hold Open Door Closers and LCN 1460DA Door Closers to deliver reliable door hardware.
